Long ago, an army of knights known as the Order of the Silver Cross attacked count Orlack's castle. The mission was to annihilate the Lord of Shadows and all his subjects. The battle was fierce, leaving a large number of victims on both sides. But finally, a few knights managed to access the main crypt and confront Orlack. The count managed to defeat a dozen warriors before being cornered by the invaders. The end had come. However, he managed to transform once again into his vampiric form, escaping between spears and arrows into the dark night of Transylvania. Years passed and the wounds of war were healing. Earl Orlack made the lonely return home and only one word kept him alive. Vengeance.
