Issue No 4

THE BEST PAPERMAG

Welcome to the 4th issue of SHOCK.

Thank a lot for all the positive reactions.

Unfortunately a lot of packages with SHOCK #3 didn't arrive at our readers addresses, we hope it will be better this time.

We are glad to hear that also other people are planning to make a Paper Magazine like; F4cg(pirates), Crazy and Ruthless, we hope to get some competition now.

We think this issue contains very much text and also new and very cool graphix, so this might be the best issue till now. Anyway enjoy the magazine and keep up the positive reactions.

Also druid couldn't that much this time due to his school, a broken discdrive and an amiga shouting for attention.

Anyways we would like to thank these people for their useful help and tenderness...

Pyle, Illusionist, Destino, Bod, Psycho, Shark, Deff, Crush, Gene, Excell, Murdock, Nam, Rockstar, Antichrist, Mr.Wax.

(the tenderness was a joke...)

have fun reading the mag...

Board name: Channel 0

Sys op : Crumbsucker  
Spitfire

Board # : (718)/356-1879

Group : Fantasy+Action+Headlines

This Month we present you the board review from Channel 0, Thank the Crumbsucker, for giving us the information we needed to make this board review...

The board started about 2 years ago, and under the name Darkside, a few months later it became Falcon HQ's, then Crumbsucker joined Fantasy and changed the board name to Channel 0, a few months later Falcon split up, and it became Culture HQ's, after some problems, Crumbsucker dropped Culture and it became Action+Fantasy HQ's, which it still is...

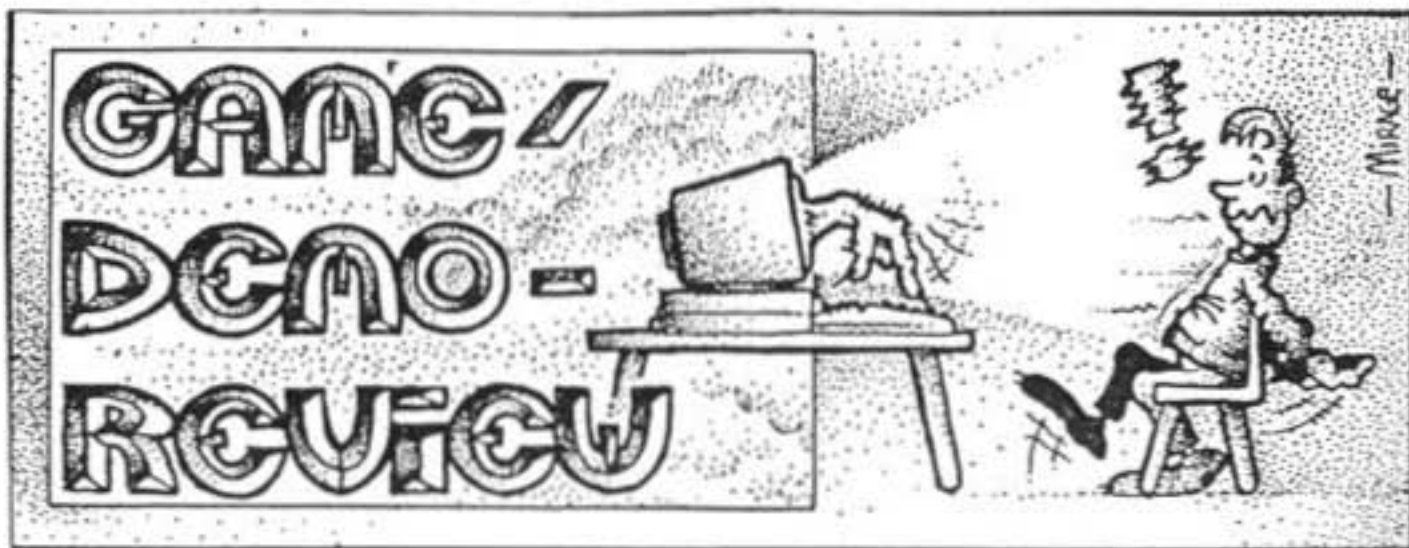

The board gets about 25 calls per day, and most of them post as well, the board has about 130 users, and about 50 of them are European, about 7% of the users have n/a, the Board Staff consists out of Crumbsucker(sys-op), and Spitfire/Action(cosys-op), there are 4 subs, sub zero, new wares, headlines and real life, the subs are pretty strict. You will get deleted when you don't call for about 3 weeks. Only fantasy contacts and users which deserve to get n/a get n/a...

The board is great fun, and has improved very much these last months, The speed is quite high, but some long wares aren't uploaded in time, but the rest is very fast!, The subs are quite good also, so it's really worth calling!

If you want to help us in anyway, then contact us

Game name: Rick dangerous II  
 Company : Micro Style  
 Cracking : Censor Design  
 Importing: Exodus  
 Version : +3

He is back, our dear 'indiana'Rick is back in London to rest from his jungle adventure...  
 But he he soon figures out that he can forget the resting because sum' aliens(not from the movie...) got fried and invated london...  
 This game has 5 levels of which are painted in the same style as Rick Dangerous 1 and so recreating the atmosphere of the old friend, like a reunion with an old friend...  
 the game is quite nice and will keep you busy for a couple of hours though it might get a bit bored while the variation isn't very large.  
 The sound is good and the effects arenice...  
 The build in trainer in which you can choose for the 1st till the 4th level can be quite handy, but it will make you a kind of lazy, just skip the level when you can't complete it.

SHOCK gives 79 out of 100

**SHOCK**

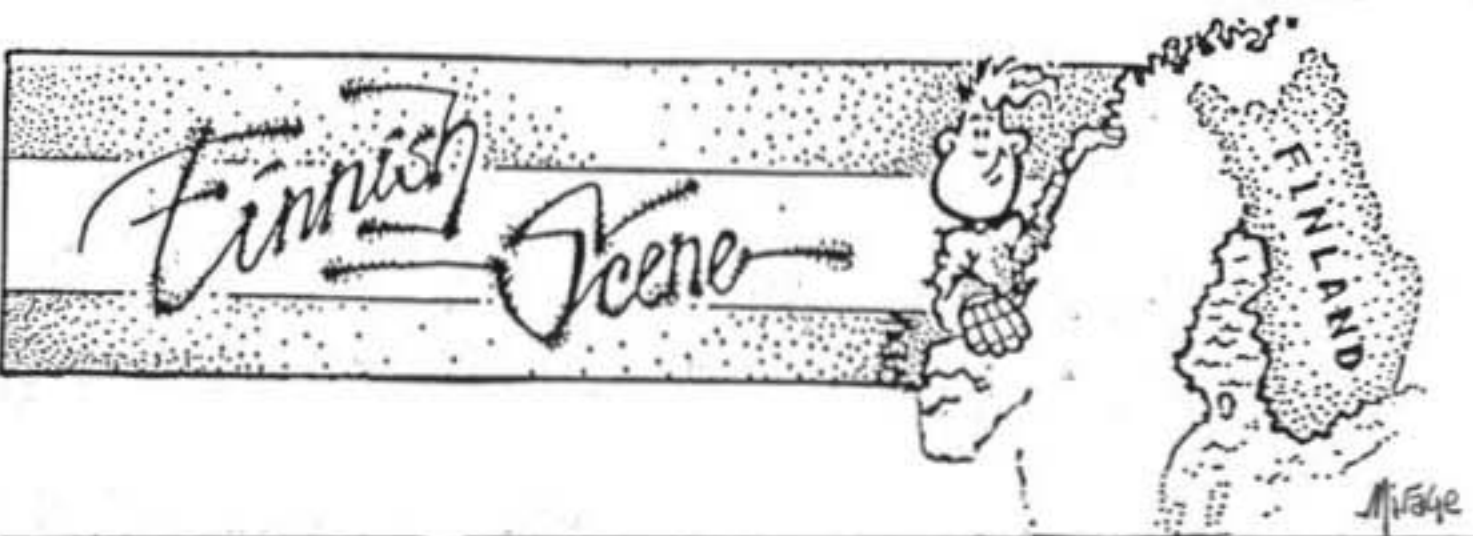

GAME NAME: MONTY PYTHON'S FLYING CIRCUS  
 COMPANY : VIRGIN  
 CRACKING : EXTASY  
 IMPORTING: DESTINY  
 VERSION : +2

Bummer, Monty Python, famous from the television and releasers of marvelous movies(a fish called wanda, the quest for the holy grale) are now back with this downgraded game. The intro starts nice with the cheese protection (I wonder why a french/italian didn't crack it, they have a know-how on cheeses after all).  
 But as soonas the python logo fills your screen with disgust you know you are dealing with a game that was ment to be a beautiful baby, but turned out to be a monster.  
 The grafix are not real great, but they fit in the python circus and the sound are out-aged just like the game-play with it's jumping screens.  
 This game is not a real hit and it will certainly not drive you around the bend.

SHOCK gives 62 out of 100

There is NO Party Review in the month's shock. Because our Party Reporters, had a lack of time, both Bod/talent and Psycho/Censor, couldn't finnish their reviews in time, They of course will be printed in the next issue of shock, Together with this month's Venlo Meeting...

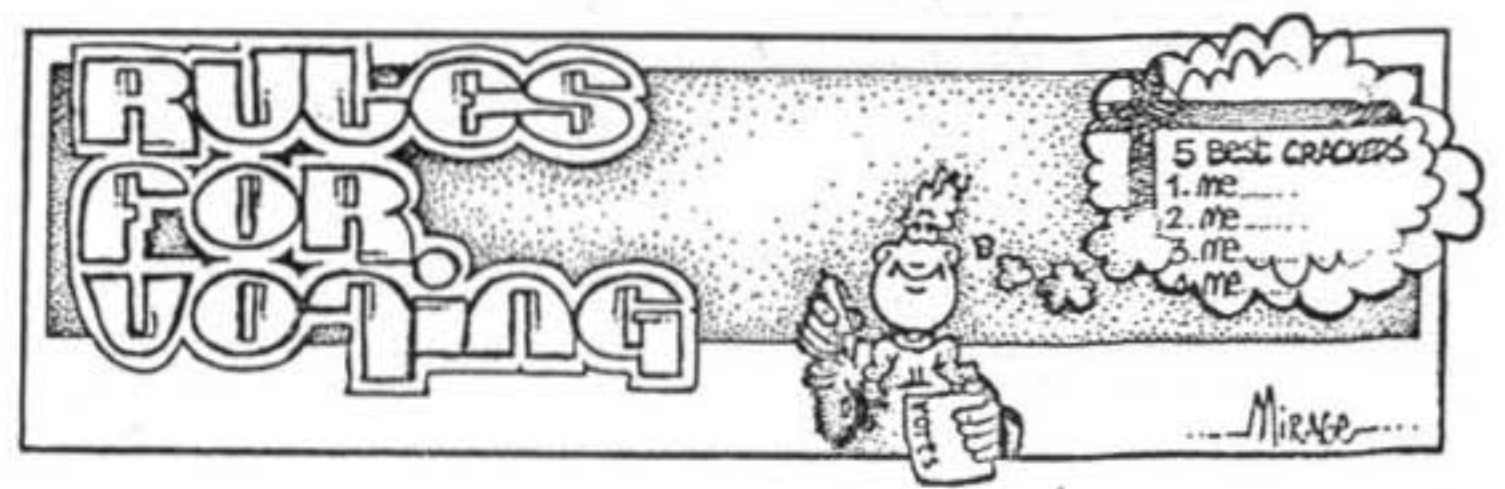

This is a little article about Finnish scene, written by destino of origo to update your knowledge.

As I'm in demogroup i start this article with telling about the finnish demogroups: Only heavyweight class demo-groups in finland at the moment are - in my opinion - origo and beyond force. What, only groups..? Well let me give you some further information... Old legend FIG is now completely dead, as FCS is in army, ROCK in Origo and rest of their members... Also Z-CIRCLE is very unactive, yeah TMS, WALLIE and VIZ are still alive, they code & realease something every now and then, ain't active on 64, even they're still alive(they just built a cool party in joutsa this summer...) MOTION seems 2 b dead, sum members of'em have formed DEATHSECTOR, which is making its best to earn a place as a real demogroup, time will show if they have future... Another new interesting group in Finland is TOPAZ designs, with members from DREAM etc. I've heard some rumours they'd release a pretty cool demo in few weeks... Also BROWBEAT still exists, with members like DR.CODE (coding), CRASH'n'ZWIZER (gfx) etc.i've also heard some stories about possible co-demo between them and EXTASY. BEYOND FORCE is the other ruling demogroup in Finland, but even they ain't as strong as they could be, as Solomon is still in army and TNT seems to be pretty lazy guy... About their plans, they're coding three games: one from HAWKEYE(it should be really violent...)with music mainly by ANVILE & couple of tunes + sound fx by AMJ, second by TNT(Elitekiller?!..), and third by their norwegian members. About ORIGO I don't write so much, because i wouldn't be objective anyway.I only cry for "lazyness" of our coders(occupational disease, i'm affraid)and tell you, that during the holy year 1990 we're going to release at least 2 demos more, other in a month or a bit later(it also might be a co-demo, i don't know for sure yet) and another in the very end of this year, the "sursum corda" project from which i personally except quite alot...

OK, demoscene in Finland is pretty cool, still... But how about other sides of computing then? Well, When it comes to cracking, here's only one group which is clearly above the others, and it's of coz the cracking half of the deceased legend CONTEX, now called EXTASY. They are only who are competitive with elitegroups of cracking, all the rest cracking groups in Finland maybe have good crackers, but they are unable to get hot originals fast and often enough.

In this article I'll mostly overlook 1) importing, I just mention only group worth mentioning: again EXTASY, and 2) foreign(multinational)groups, which have members(but not hq's)in Finland, i just tell that the scale is wide, from eurasia to WOT...

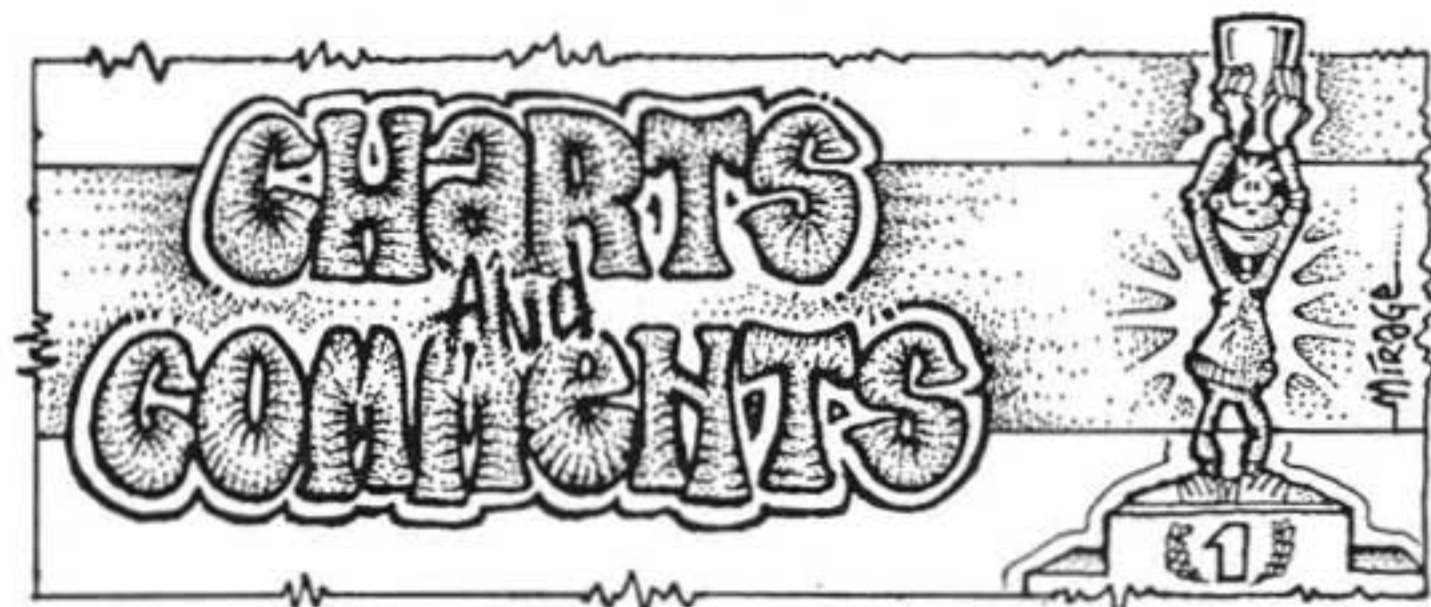

The rules are still the same...  
 You don't vote for yourself.  
 Don't give sympathic points.  
 Be objective and hounest (but keep that to the votesheet).

### European Cracker Chart

The major change over here is that CENSOR DESIGN climbed the ladder from the 11th to the 7th place, probably because they had 1 or 2 major first releases, while a lot of groups had none, while they were standing above CENSOR DESIGN in the last issue of shock.

CRAZY gave up sum' steps due to their release-less last month.

ILLUSION also fell down abit, perhaps they weren't in the mood for releasing since their dear partners ATC left.

X-RAY came out of the dark night and took possession of the 10th place.

### European Demo Chart

Nothing special here, just that the PARANOMIC kids took a sprint to the 3rd place, FLASH INC. tried the same, but ran in the opposite way and ended up down the chart...

### American Single Cracker Chart

This is one of the new subs in the chart sup of shock papermagazine, it is replacing the the European Single Cracker Chart, because they didn't recieve that many votes.

### Graphics Chart

This sub is also of the shock list, while it is such a boring chart with hardly any changes in it.

5.	(-) Hell Hacker/Tsm	54

### European Import Chart

It seems that the numbers 2,4 and 5 were playing cards, EXTASY lost so CRAZY and GENESIS drilled up on step each.

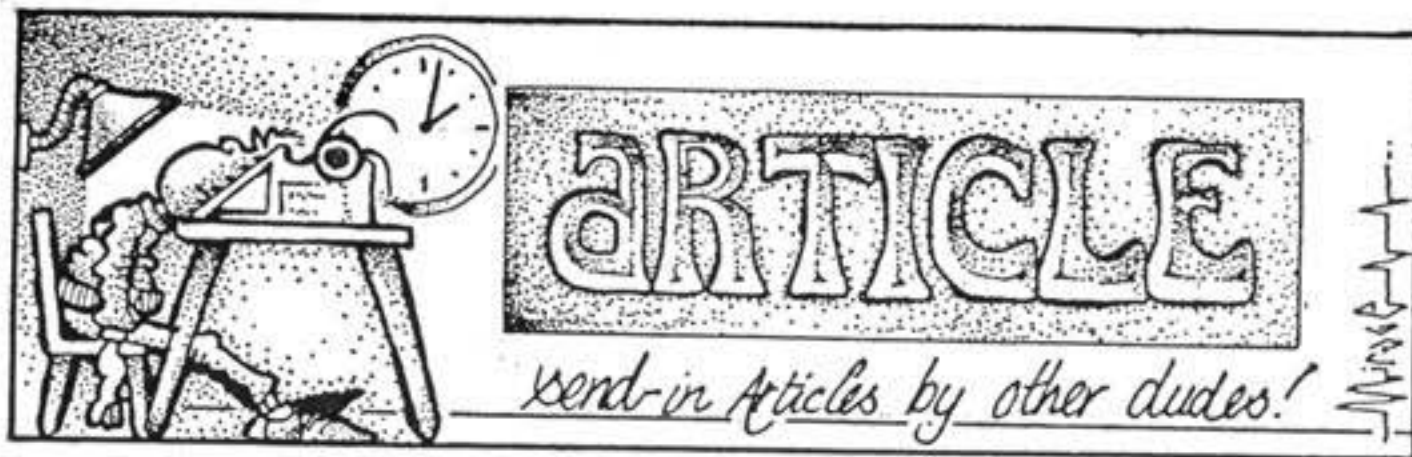

### American Import Chart

EXODUS is having a hardtime while NEI is climbing closer and closer to the #1 place, at the moment they are both on the #1, but when you take a good look at which group is importing from which group, you'd say NEI has the future.

### American Board Chart

Well this is also a new chart replacing another dull one, the American Cracker Chart (waiting for a change here is like waiting for your girl to suck your dick when it just got cut of).

We hope you like the new sub, just look how the points are divided, this chart might change ones in a while when everyone is so close to each other!

This month we only got ONE article, about Exory of Holocaust, That he re-cracked "Storm Lord II" from Censor Design, "petrovic Basketball" from Akarak, And many more games, But we don't print that because, to many other magazines are also gonna write something about him, and i think he got to much attention, but when you want to write an article about anything then just send it to the shock address!...
