

Glitter is magic by Myy^Paraguay

I had an idea that I want to bring glitter for all the visitors that they could be as awesome unicorns that they are. What would be than portable glitter bar that is also an awesome accessorie.

The hat is a base and this was only ready made part. I painted the hat and attached the fairy lights to the hat. The battery pack of the lights is glued inside the hat. I added tull fabric over the lights to hide the wires and make the hat look nicer.

The glitter decorations are made with cardboard/foam and coated with paint and glitter glue that I make my self. The glitter glue is made by mixing different coloured glitters with glue. The flowers on the hat were decorated by glueing plastic rhinestones to the pedals of the flowers.

I attached the decorations in different ways. Some are glued with different glues(superglue and hot glue) and some are attached with metal wire. The glitter jars and other make-up containers are attached with elastic band.
